## Overview

ADHD in adults is the persistence of ADHD since childhood. Seven prospective longitudinal studies have demonstrated its persistence in approximately 60% of children. Three decades of international scientific research and recognition by the World Health Organization make evident the validity of this disorder around the world. Unfortunately, most training programs provide little, if any, education for diagnosis and treatment of ADHD in adults. This presentation will focus on the presenting symptoms of the patient, why to consider including screening in your initial evaluation, how to parse out ADHD from other concurrent psychiatric disorders, how to diagnostically prioritize concurrent psychiatric disorders, what ADHD medications are available and how to make choices, and a list of psychotherapeutic approaches to address executive dysfunction and negative self-image. The presentation will also highlight ADHD in adults over the age of 50, a new and emerging recognition of lifelong symptoms.

## Learning Objectives

- 1) Understand prevalence, symptom presentation and diagnostic criteria for ADHD in adults.
- 2) Recognize psychiatric comorbidity presenting with adult ADHD and identify diagnostic prioritization and pharmacologic algorithms for treatment.
- 3) Learn effective psychotherapies for adults with ADHD.

## Faculty

**David W. Goodman, MD, DFAPA** is Assistant Professor of Psychiatry and Behavioral Sciences at the Johns Hopkins University School of Medicine. He is also Director of the Adult Attention Deficit Disorder Center of Maryland in Lutherville and Director of Suburban Psychiatric Associates, LLC. Dr. Goodman has continued a full-time clinical practice focusing on the diagnosis and treatment of mood disorders, adult Attention Deficit/Hyperactivity Disorder, Anxiety Disorders. He has presented over 600 lectures to primary care physicians, psychiatrists, medical specialists and the general public. His psychiatric commentary has been featured on national and regional television and radio. He has been an ADHD consultant to Major League Baseball and now a consultant to the National Football League. Dr. Goodman has been a Principal Investigator for multi-site Phase II and III drug trials for the treatment of adult Attention Deficit/Hyperactivity Disorder and Major Depression. He is the lead author on the largest adult ADHD trial published and the lead author on the largest survey assessment of physician clinical practice for adults with ADHD. He has published articles in peer-reviewed journals, authored four book chapters and [The Black Book of ADHD](#).

## Target Audience

This activity is designed for psychiatrists and residents/fellows. Other groups may find this educational activity of interest including: medical students, other non-psychiatrist physicians including primary care, as well as psychologists, nurses, social workers, counselors and other mental health care professionals.

## Estimated Time

60 minutes

## Continuing Medical Education Credit

This activity has been planned and implemented in accordance with the accreditation and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the American Psychiatric Association (APA) and the Ohio Psychiatric Physicians Association (OPPA). The APA is accredited by the ACCME to provide continuing education for physicians.

The American Psychiatric Association designates this activity for a maximum of 1 AMA PRA Category 1 Credit. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

## How to Earn Credit

Participants who wish to earn *AMA PRA Category 1 Credit*™ or a certificate of participation may do so by completing all sections of the course including the evaluation. After evaluating the program, course participants will be provided with an opportunity to claim hours of participation and print an official CME certificate (physicians) or certificate of participation (non-physicians) showing the completion date and hours earned.
